

LARGE PROJECT AND MAJOR EVENT COORDINATION

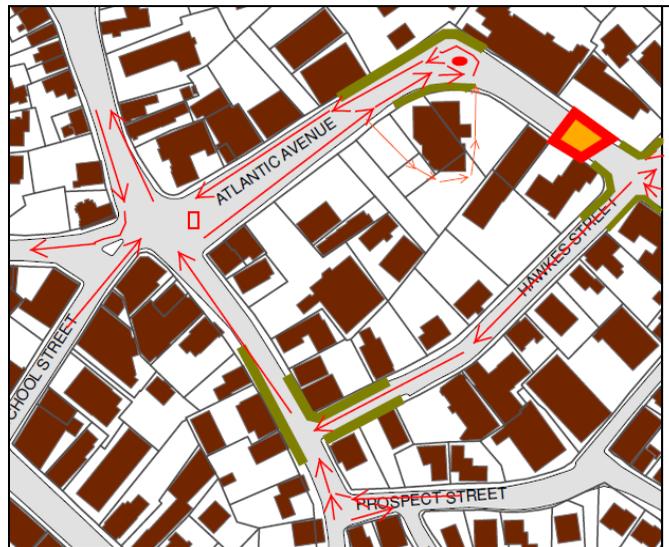

IMPORTANT MESSAGE: Over the next three years the residents and property owners within the uptown and downtown areas of Marblehead will experience significant disruptions related to major public improvement projects occurring along Atlantic Avenue and Essex, School, and Spring Streets. The attached overview is offered by the Town of Marblehead as an information management tool for use by Town Departments, the public, impacted property owners, and the press. It is important that the public understand the following:

1. The Town is functioning as an information facilitator and the actual projects and events are managed by separate parties not under our direct control; and
2. All information & project details are subject to change due to site conditions, scheduling, and issues beyond our control. Separate meeting series will be held and information sources will be identified in order for the public to learn more about individual projects and/or events. (See **"INFORMATION SOURCES"** below)

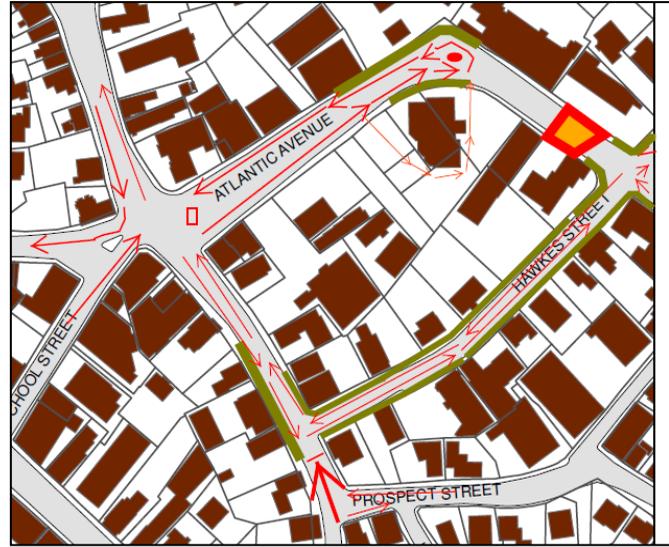

TRAFFIC ROUTING ALTERNATIVES

The Police Department will be utilizing **one or more** traffic routing plans (see below) during the duration of the Drainage Project. All methods of communication will identify which plans are in use at any given time throughout the overall project.
